

STEPHENSON GOBIN

RoHS & WEEE DECLARATION

All products manufactured by Stephenson Gobin Limited are compliant with the RoHS 3 Amendment (2015/863/EU) (also covers previous versions RoHS 2 – 2011/65/EU and RoHS 1 – 2002/96/EC) and WEEE (2012/96/EC) directives or its exemptions.

Our exemption specific for steel contained in our product is based on the following clause:

- Exemption 6(a) – steel containing up to 0.35% lead by weight. (For our steel we mainly use: 230M07).

Our exemption specific for brass contained in our product is based on the following clause:

- Exemption 6(c) – copper alloy containing up to 4% lead by weight. (For our brass we use: Brass CW614N or CuZn39Pb3).

Our exemption specific for aluminium contained in our product is based on the following clause:

- Exemption 6(b) – aluminium alloy containing up to 0.4% lead by weight.

We also have a general exemption:

- Article 2, Scope 4 – equipment which is specifically designed, and is to be installed, as part of another type of equipment that is excluded or does not fall within the scope of this Directive, which can fulfil its function only if it is part of that equipment, and which can be replaced only by same specifically designed equipment.

It is further declared that based on the reasonable inquiry and current information received from suppliers of the raw materials used in the above listed products, this certification is true, accurate and complete at the date of this issue.

The compliance applies regardless of whether products manufactured by Stephenson Gobin Limited are used by themselves or as part of an assembly that falls within the scope of the above directives. This declaration covers all Stephenson Gobin products.

By stating that we comply with the RoHS Directive 3 Amendment (2015/863/EU) we are confirming that we are compliant with the additional four materials restricted in this updated directive.
